

# Rolls

## DD-Washer HybridSeal

*On Site Service Solutions*

### Solution description

- PR Rolls reinforced inflatable cut & join to length hybrid seal.
- On Site cut & join to length DD-washer sealing system
- T-profile: Made from high temperature resistant hybrid plastic. On Site unique joint.
- Inflatable Rubber Seal: High quality temperature resistant inflatable seal. On Site vulcanization.
- On Site cut and joint tools with purpose build mounting tools

### Benefits

- Extended warranty 24 months
- On Site cut & join to length.
- High accuracy.
- Faster and easier mounting.
- Less risks for mounting faults and breaks.
- Low friction.
- Heat (260 °C) & chemical resistant.
- Longer lifetime.

**Tailor-made Solutions for Increased Reliability and Runnability**

# Rolls

## DD-Washer HybridSeal

*On Site Service Solutions*

Avoid problems such as:

Existing old seals removed from washer only after 8 months in use.

Replaced with  
PR Rolls *HybridSeal System*

PR Rolls *HybridSeal System*  
*Proven and Tested* Solution  
to solve problems such as :

- Existing old sealing systems can wear out DD-washers metal sealing surfaces.
- Existing old sealing systems may have inadequate heat and chemical resistance.
- Inaccurate seals. Seals may be delivered according the DD-washer standard drum measures which may be inaccurate and not up to date real measures.
- Customer might not know the real up to date measures of the drum. Drums might be machined few times during the operational history.
