## TecnoClean Technical information

- TecnoClean coatings are doctorable tungsten carbide- PTFE combination coatings with excellent non-stick properties and wear resistance. They solve problems such as sticking, dust, dirt, marking, picking and bad heat transfer.
- TecnoClean improves smooth web release from cylinder to another and decreases breaks. It facilitates machine runnability and web control and improves paper quality.
- TecnoClean coatings give good heat transfer and thus raise drying capacity and save energy.
- TecnoClean coatings can be used on dryers, dryer fabric rolls, paper rolls, cooling cylinders and sheet cutter nip rolls.
- The properties of TecnoClean coatings can be customized tailor made.
- The composition of the coating is close to original coating material and roughness of the finished surface is low.
